> Use a WINE front-end:
>
> - Steam (*pre-installed*) has a Windows compatibility layer built-in.
> - Lutris (*pre-installed*) for non-Steam video games.
> - Heroic for Epic Games, GOG, and Amazon Games integration.
> - Bottles for general-purpose applications or as an alternative to Lutris.
> - itch for games on itch.io.
> - WineZGUI (*pre-installed*) for Windows applications that don't require special considerations for their prefix.
